

OUR OCCUPATIONAL HEALTH, SAFETY AND ENVIRONMENTAL POLICY

CSP Inc. common goal with its senior management and all domestic / foreign employees; In all stages of product and process design, production and service activities, in accordance with the expectations and requirements of our organization, our employees, and all internal / external issues; To ensure compliance with the requirements of the Occupational Health, Safety and Environmental Management System and to continuously improve its effectiveness. In order to achieve this goal, the following principles have been determined:

- To maintain an Occupational Health Safety and Environmental Management System, which is supported by senior management and adopted and implemented by all employees, audited, reviewed, open for the monitoring of relevant parties, enhancing Occupational Health Safety and Environmental performance and continuously improving
- To comply with occupational safety, environmental and ergonomics goals in product and process design, production process or significant process changes
- To control and reduce the amount of all wastes and their effects on the environment
- Within the context of the establishment, to ensure the protection of the environment by evaluating the effects of all potential pollution and taking necessary measures.
- To minimize the consumption of energy and environmental natural resources by encouraging and supporting effective use, recovery and re-evaluation activities
- To increase the awareness of all our employees and suppliers by creating a culture of occupational safety and environmental awareness, supporting their work in this direction and to follow good practices
- To use more recycled raw materials and technologies with less environmental impact in product and process design, production process and as much as possible in all activities
- To set clearly defined performance targets integrated into business and risk management plans, to monitor and report relevant indicators for both employees and subcontractors, to analyze results and to communicate with identified stakeholders
- Based on the adoption of proactive approaches in order to prevent occupational accidents and occupational diseases, in this context, to implement national and international practices by complying with all legislation and standards.
- State institutions in Turkey in cooperation with the Occupational Health and Safety of the introduction of culture, to support the development of legislation in this regard
- Establishing effective Occupational Health and Safety Management Systems based on the inferences and risk analysis gained from past experiences, creating a continuous performance improvement and safe working culture
 - To encourage the implementation of Occupational Health and Safety rules and environmental awareness outside the workplace.
